### Project 3 reflection

For me, this was a big step up from the last project in terms of difficulty. I had to use one of my deadline extensions as well, although it was mostly because there were a lot of other things going on in my life. However, just like the previous 2 projects, I enjoyed this project and the challenges it had to offer. It took several hours and even more resubmits to finally get a perfect score on the auto grader, but not once did I get frustrated or angry, because I was enjoying finding and fixing my errors. These projects help me so much more than the problem sets and comprehension quizzes when it comes to understanding the module topics. Thank you for another great project!
